Education

University of Fortaleza (Unifor) — **Fortaleza CE, Brazil**
Bachelor of Computer Science. GPA: 8.86/10 — June, 2025

Experience

Docato — **Ponta Grossa PR, Brazil**
Full-Stack Software Engineer — 04/2025 – Present

- Engineered scalable full-stack solutions using Next.js and NestJS to support critical Legal Ops automation workflows, supporting a platform that has processed over R$ 1.6 billion in financial automations.
- Integrated LLM workflows and developed MCP servers to automate repetitive engineering tasks, generating comprehensive test suites and boosting overall developer velocity.
- Fortified platform security by engineering RESTful APIs with strict JWT-based RBAC, safeguarding sensitive litigation and banking data against unauthorized access in compliance with strict audit standards.
- Pioneered a modular design system using Shadcn/UI and Tailwind CSS, standardizing components for complex legal dashboards, which accelerated the delivery of new financial reconciliation features by 35%.
- Maximized application performance by implementing lazy loading and code splitting strategies, ensuring seamless rendering of large-scale judicial datasets and reducing load latency by 45%.
- Systematized API documentation protocols using Swagger, establishing a unified source of truth that streamlined frontend-backend collaboration and reduced API integration time by 20%.
- Revitalized complex database query structures using Prisma ORM and PostgreSQL, optimizing data retrieval for massive judicial datasets and slashing report generation time by 40%.

DD Solutions — **Fortaleza CE, Brazil**
Front-end Software Engineer — 10/2021 – 03/2025

- Collaborated in the migration of analytics dashboards from Grafana to a custom React and TypeScript system, engineering a highly optimized frontend capable of rendering massive urban datasets without freezing, achieving a 40% reduction in load times.
- Innovated an automated image annotation workflow that slashed manual analysis time by 60%, revolutionizing the processing of urban data coordinates.
- Revitalized legacy SQL query structures to boost data retrieval performance by 25%, directly enhancing platform responsiveness for end-users.
- Architected high-volume REST API integrations to process Big Data streams in real-time, ensuring uninterrupted demand support.
- Orchestrated automated CI/CD deployment pipelines on Firebase and Vercel, guaranteeing continuous delivery and environment stability across development stages.
- Constructed a robust library of reusable, type-safe React components, standardizing the platform's visual identity and accelerating new feature development cycles by 30%.

Skills

Technical: React, Next.js, Node.js, NestJS, JavaScript, TypeScript, Python, AI-Assisted Development (Claude, OpenAI Codex, LLM Workflows, MCP Servers), Styling/UI Systems (Tailwind CSS, Shadcn/UI), Zustand, Prisma ORM, Mongoose, REST API, Swagger, PostgreSQL, MongoDB, Firebase, Docker, Git, Grafana, Agile (Scrum/Kanban), Data Modeling, Jest, React Testing Library, Playwright
Language: Portuguese, English
